

Co-Ordinator Training

Co-Ordinator Map Client User

The Overview

This course combines instructor-led training with hands-on resource data manipulation of the Co-Ordinator system. This training equips the candidate with the necessary knowledge and tools to communicate current resource location to analyse, search and filter on previously collected data and to understand the status of the resources.

Objectives

This course gives Control Room personnel comprehensive knowledge of the Co-Ordinator map client in order to fully inform resourcing decisions and to monitor historic resource locations by:

- Showing, hiding and updating of current resources
- Accessing and filtering of historical data
- Saving, retrieving and exporting of location data
- Using 'Fixed Objects' to identify key locations
- Using local Geofences – Co-Ordinator 7 only

The course allows delegates to apply the knowledge gained in a safe environment using a training system and/or interact with their live system.

This course will include a brief overview of the Administration program to aid comprehension of grouping, vehicle types, statuses and users.

Target Audience

This course is intended for resource locaters, demand management and people responsible for compliance checks. APD Communications recommends this course to any one of the above wishing to gain current and historic resource location data.

Pre Requisites

Before attending this course, candidates should have:

- A working knowledge of their environment
- Access to identifiers such as call signs and vehicle registration numbers
- Knowledge of the INCA is preferable but not essential

Course Detail

This training course is essential for new installations, new staff or as part of refresher training.

Course duration: Half day

Optimum training number: Six people

Best delivery location: Customer site
