

INCA and INCA 2 Training

INCA Device Installation

The Overview

This workshop combines instructor-led training with the supervised install of an INCA unit and the associated wiring looms in a vehicle. This training workshop equips the candidate with the necessary knowledge and practical ability to take a configured INCA unit, install it and to perform local diagnostics before use.

Objectives

This course gives the candidate the knowledge of:

- Interconnections of INCA unit
- Good practice and adherence to convention
- Design assistance in wiring and connectivity
- INCA functionality
- Wiring diagrams, conventions and interconnecting devices
- The Dos and Don'ts of INCA installation
- Placing the INCA in the correct position to minimise potential interference and maximise bearer and GPS coverage
- Sourcing of a constant live feed or tracing back directly to the battery
- The sourcing of an ignition sense
- Wiring of inputs and outputs devices via relays if appropriate

Target Audience

APD Communications recommends this course to in-house and third-party auto-electricians, vehicle component installers, garage mechanics and/or fleet managers.

Pre Requisites

Before attending this course, candidates should have:

- A working knowledge of their environment
- A brief understanding of AVL systems
- Some understanding of vehicle electrics
- Some experience of using command line utilities. This is preferable but not essential

Course Detail

Course duration: 1 day (regularly delivered as two consecutive half-day sessions)

Optimum training number: Four people

Best delivery location: Customer site

Public course: None scheduled

Associated courses: Programming INCA Configurations

For dates and prices of private or public training courses or any other APD Communications product-line training enquiry, email Training@APDComms.com or contact your Account Manager.
